Boston Treatment Center is a 50-bed inpatient detoxification and treatment service that treats and cares for men and women who need to be medically detoxified from alcohol, opiates and benzodiazepines.

Our treatment philosophy includes treating you with dignity and respect, and we believe that you have the ability to grow when given support, education and direction. We also believe that each person is different, and our goal is to help you find your own path to recovery.

What is detoxification?

Detoxification is designed to treat the acute physiological effects of stopping drug use, such as benzodiazepines, barbiturates and other sedatives, opiates and alcohol. In some cases, detoxification is a medical necessity, as untreated withdrawal may be medically dangerous or even fatal. Boston Treatment Center admits almost 5,000 people for treatment each year.

About the Boston Treatment Center

About Lahey Health Behavioral Services

We provide a range of outpatient, inpatient and residential care, including mental health clinics; addiction treatment; family services; mobile crisis teams; psychiatric treatment and school-based programs for children and teens.

We serve communities in Greater Boston, the North Shore and the Merrimack Valley, Massachusetts.

We treat you with dignity and respect and believe that you have the ability to grow and recover.

Who We Serve

At the Boston Treatment Center we understand substance use, dependence, or addiction as a problem that has many causes that include genetic, biological, psychological and social reasons. We also believe that the reason people struggle with substance use must be addressed in treatment if they are going to get better. These reasons are unique and different for each person.

We serve residents from all over Massachusetts, with the majority of our clients coming from the immediate surrounding communities of metro Boston. We feel privileged to serve a multicultural population, and many of our staff are bilingual.

Our Services

1. Safe medical detoxification
2. Group counseling
3. Support from the community of others who are in recovery from addiction
4. Aftercare planning
5. Referral to ongoing care and/or 12-step programs

Who can be referred

Generally, we accept referrals from the client him or herself, hospitals, shelters, other agencies, families, or anybody who would like to get a patient or loved one into treatment.

The Intake Process

We do an initial intake by phone or in person. This pre-screening is focused on medical criteria for detoxification and your current medical conditions. If you meet the basic criteria, and you if have a serious medical or psychiatric condition, we may also need to do a medical evaluation. If you are on certain medications, we may also require a list of them.

How can we help you?

We accept most insurances, including Medicaid. We try to remain competitive in pricing. When necessary, we make every effort to help you pay for your treatment.

Our fee structure is available to all patients, and we use monies received from other sources for clients who qualify due to financial need. Upon request, there is a sliding fee scale available at the time of admission.
